4 GREAT REASONS TO GO VEGAN

ANIMALS

Going vegan is the only true response for animal lovers. That way, you avoid cruelty to all living beings.

HEALTH

Compared to animal foods, vegan foods contribute to lower risks of heart disease, cancer & diabetes, improved weight management, & enhanced libido.

SUSTAINABLE FOOD PRODUCTION

Vegan foods can take 10 times less land & 100 times less water to produce than animal-based foods!

ENVIRONMENT

Livestock farming is responsible for 50% of our global greenhouse gas emissions and is a significant contributor to air & water pollution.
